

Our staff and volunteers have worked to establish the U.S. Department of Education's Green Ribbon Schools award program in dozens of states, strengthening the program's "three pillars" of a green school as unifying criteria for the movement. This criteria is now used by organizations in 32 countries around the world. In 2015, the Center unveiled Learning Lab, a platform for curriculum content, which piloted with over 1,000 teachers in 26 countries.

## Our Founding Sponsor

The Center For Green Schools was launched at USGBC with the generous support of United Technologies Corporation (UTC) as our Founding Sponsor. Through UTC's years of support, the Center has helped schools across the nation and around the world on their journey to become green.

UTC's support of the Center goes beyond founding sponsorship. Worldwide, employees throughout the company's many facets are supporting green schools, participating in Green Apple Day Of Service, encouraging local schools and districts to lead sustainability initiatives, and introducing a new generation to the green schools movement.
